Software Developer

PERSONAL INFORMATION

Gender	:	Male
Nationality	:	Indian (Karnataka)
Languages Known	:	English, Tamil, Hindi, Kannada, Malayalam & Tulu
Qualification	:	MCA(Master of Computer Application)
Current location	:	Dubai(On long term visit visa)
Marital Status	:	Single
Age	:	27
Carrier Level	:	Junior level In UAE(Experince in India)

QULIFICATION And EXPERIENCE:

- I have completed a Bachelor degree BCA (3 years), and a Master degree (3 years) in Computer Application.
- In the time of internship I got a training on SAP ABAP (Advanced business application program) and android and backend PHP (MYSQL), sap CRM, Testing and other office related works etc.
- I got placed in Maventic Innovative Solution Ltd company as SAP Abap technical Consultant and worked on two projects.

KEY SKILLS SOFTWARE DEVELOPMENT:

- **Good in C, C++ and java programming language.**
- **Good in OOPS concept.**
  - **Class, object, sigle instanse class, constructor, inheritance, overloading, overriding, functions etc.**
- **Good in understand the flow of the software.**
  - **Like website we are using the HTML for the create the content for the web page, CSS for the formating and javascript for the client side scripting language, and PHP or C++ are for the serverside language.**
- **Good understanding of HTML, CSS, MySQL, javascript, SQL query, RDMS concepts.**
  - **Created database and tables and column with datatype int, char, varchar, timestamp etc.**
  - **Worked on RDMS and created complex query using join (inner join, outer join, right outer join, left outer join).**
  - **Good understanding on RDMS table relations.**
- **Worked on XAMPP and android studio.**
  - **For Xampp with apache server and mysql.**
- **Good in debugging and creative thinking for create a reusable code and dynamic code.**
  - **Good understanding of pointer concept for developing the dynamic code.**
- **Good understanding of the API.**
- **Good understanding of flow like Development->quality(testing)->production.**

KEY SKILLS ON SAP ABAP PROGRAMMING(ADVANCED BUSINESS PROGRAMMING LANGUAGE):

- **Good hands on experience on OOPS concept.**
- **Worked on backend handle the data in the table (insert, select[search dynamic search], update and delete)**
  - **Created dynamic query.**
- **Good hands-on Experience in SAP ABAP Object Oriented Programming**
- **Report Programming**
- **Extensively worked in Data Dictionary:**
  - **Data Elements**
  - **Domain**
  - **Search Helps**
  - **Table Types**
  - **Structures**
- **BADI Implementation & Enhancements**
- **Function Modules**

- **GOOD IN:**
  - *Quick learner*, Friendly in nature and flexible to adjust for any work environment.
  - Good in writing reusable code and dynamic querys also good in debugg and find the errors.
  - Prepair Report and Presentation, also able to handle phone calls.
  - Hard working and flexible to *extend work hour to complete the task or work*.
  - Highly responsible and reliable.
  - Strong troubleshooting and critical thinking skill.
  - Report daily, weekly and monthly manner to the higher authority.

Supervisor Production Skill:	**Language Known:**
• Hands on experience in textile *business flow*, ➢ Sales ➢ Enquiry ➢ Quotation ➢ PO (Purchase Order) ➢ Production ➢ Invoice ➢ DO(Delivery Order)	1. English (Fluient Read and Write) 2. Tamil (Fluient) 3. Hindi (Intermidiate) 4. Malayalam (Intermidiate) 5. Kannada (Native)

PROJECT WORK

Project Name : SAP ABAP support for Usha international ltd	
Client	**Usha international ltd**
Skills Used	SAP ABAP
Team Size	12
Duration	8 Months
Roles & Responsibility	• Role as SAP ABAP technical consultant for the implementation. • Where we have worked on the MM (material management module). • Using BADI and events we are sending or sync the data to clarion application (UI5 Fiori application). • Created FM for store data back to the SAP. • Created a report Program to sync the Master data to the clarion application.

Explanation about recent Projects:

- Our client is USHA International Pvt ltd, they are into home appliances (Ex: Fan, heater etc.).
- Our other UI5 team created a Front end application where they enter, update, delete or modify their data for material management.
- From the UI5 Fiori application we get data using shared memory as a file in JSON format.
- Our team responsible for handling data in the backend (SAP ABAP) we have to extract data and create a dynamic query for managing (Insert, Delete, Modify, select) data in the database and write reusable and effective code for that, and response back.

Explanation about my internship:

- Where we got a training on SAP and Android and web develop training.
- We are working on an online shopping application with backend my Php (MySQL backend) we transfer the data using the API from the PHP to android (front end).
- Also I was working on the SAP ABAP programming.
- After the internship I got placed on a company for abap developer.

Why Developer!!

As a Computer application graduate I need to find a platform for utilize my skills and start my career in UAE, so I feel reputed firm like your organization is place where I can expose my talent and acquire knowledge with positive vibes.

DECLARATION

I hereby declared that the above mentioned facts are true to the best of my knowledge and belief.
